

The following is a list of laboratory tests that are eligible for STAT test priority when medically necessary.

Transfusion Medicine

ABORh/Retype	Cryoprecipitate (product order)
Cross Match	Fresh frozen plasma (product order)
DAT	Platelets (product order)
Transfusion Reaction	Red blood cells (product order)
Fetal Hemoglobin	RhIg (product order)
Type and Screen	

Chemistry

Acute Hepatitis Panel	Calcium (total, ionized)	Lipase
Alk Phos	Cardiac Panel	Lithium
ALT	Carbon Dioxide	Magnesium
Ammonia	CK	Osmolality
Amylase	Chloride	Phosphorus
Arterial blood gas	Creatine	Potassium
AST	Electrolyte Panel	Protein (CSF)
Basic metabolic	Fetal Fibronectin	PTH (intraoperative)
Beta-Hydroxybutyrate	Glucose (blood, CSF)	Salicylate
Bilirubin, Neonatal	HCG, Quantitative, Serum	Sodium
Blood Gases	HCG, Qualitative, Serum	Troponin
BNP	Haptoglobin	Uric Acid
BUN	Iron (poisoning cases)	Venous blood gas
Calcium	Lactate	

Hematology/Coagulation

CBC	APTT (Activated Partial)	Pregnancy Test
CBC with Automated Differential	Thromboplastin Time	Urinalysis
Cell Counts (CSF, Fluid)	PT (Prothrombin Time)	
Hematocrit	Fibrinogen	
Hemoglobin	D-Dimer	
Platelet Count	DIC Panel	
	INR	

Immunology/Microbiology

Blood Culture	Gram Stains
Rapid Parasite Smear	CSF smear
Group A Strep Antigen Detection	Rapid COVID, FLU and RSV by PCR

Toxicology

Acetaminophen	Digoxin	Phenobarbital
Alcohol Level	Drug Screen (Drug Abuse Panel)	Phenytoin
Amphetamine	Ethylene Glycol (Sent to RIH)	Salicylate
Barbiturate	Isopropyl (Sent to RIH)	Theophylline
Benzodiazepine	Fentanyl Screen	Valproic Acid
Carbamazepine	Methanol (Sent to RIH)	Vancomycin
Cocaine Metabolite	Methadone	
Cannabinoids	Opiate
